

专用车生产线

SPECIAL VEHICLE PRODUCTION LINE

- 罐体自动化焊接生产线从钢板下料、拼板焊接卷板成型、筒体组对、封头对接、内外纵缝焊接、内外环缝焊接等加工工序的先进制造工艺和各工序上自动化制造设备，实现制造工艺编制、生产计划安排、生产过程监控、生产和物料管理等一体化控制。
- The automated welding production line for tank bodies involves advanced manufacturing processes and automated equipment for various processing stages. These include steel plate cutting, plate assembly welding for coil forming, simple alignment, head-to-head alignment, longitudinal seam welding, and circumferential seam welding, among others. The integration of advanced manufacturing processes and automated equipment across these stages aims to achieve centralized control for manufacturing process planning, production scheduling, real-time production process monitoring, and comprehensive control over production and material management.

- 可适用于各种罐式车的生产，如“罐式车、油罐车、粉料车、化工罐、混凝土搅拌车、保温车、液罐车、沥青罐车、奶罐车、洒水车、油品配送车、啤酒罐车等各种罐车。
- It can be applied to the production of various types of tank vehicles, such as tankers, oil tankers, powder tankers, chemical tanks, concrete mixers, insulated tankers, liquid tankers, asphalt tankers, milk tankers, water sprinklers, fuel delivery trucks, beer tankers, and other diverse types of tank vehicles.
